

# Capitoné

## Product description

Capitoné can be defined as an upholstery technique with "button rivets" that was used both on the seats and to line the insides of some living room furniture. Nowadays it even applies to other fashion elements such as footwear or bags. However, Capitoné decorative panels can upholster walls with this material, simulating the textures of Chester sofas, using their particular buttons. Undoubtedly this is a different covering, a great ally for innovative and transgressive projects.
