

Iron Rods

Product description

Traditionally, iron has been used mainly in the decoration of rustic-style spaces, or in those where the intention was to create a more industrial feel. However, this way of using wrought iron has evolved considerably. Iron is a material that can provide a touch of elegance, personality and beauty with its matte black tone and of course its robust composition. Panespol Iron Rods decorative panels bring together all the benefits that iron offers, but with an advantage that will definitely make them more practical: they're lightweight and simple to assemble.

Technical characteristics

Weight:
6 Kg

Thickness:
13mm - 15mm

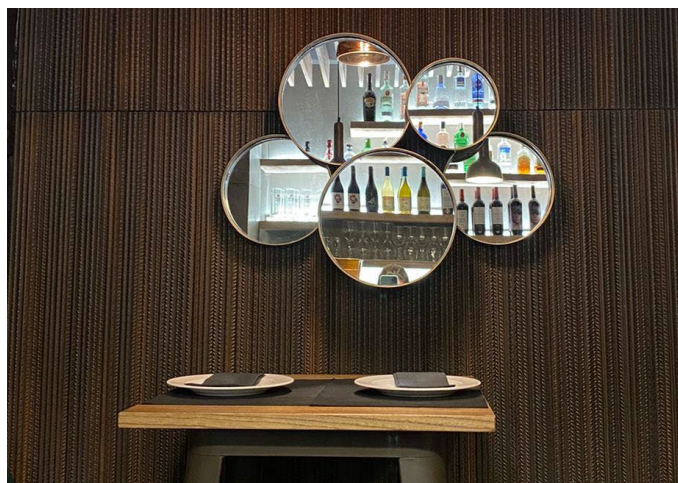

Maintenance:

If necessary, clean with water or a non-irritating or non-corrosive cleaner.

Waterproof

Impact resistance

Product features

Lightweight

Non-flammable

Strong

Non-toxic

Simple and quick

No building works are required

Recyclable

Sustainable

Certificates

Thermal insulation certificate
carried out by Tecnalia

Fireproof certificate B-s1-d0
carried out by Aitex

Fireproof certificate according to the Russian normative
carried out by Zentrum

Reduced Carbon Footprint

CE Mark

ISO 14001

Decorations and finishing options
